

But how about the user data in cloud platform? **Are the app provider and cloud platform provider truly trusted?**

JavaScript

HTTPS(SSL/TLS)

HTTPS(SSL/TLS)

(user browser)

Also how about the user data in browsers? This may be observed by malware?

Frontend

CDN

Amazon CloudFront

Amazon S3 bucket

Static webpage (html/css/javascript)  
as downloadable program

Cloud platform (e.g., AWS)
